

## 2.2.6 SISTO-C Behälterventile

SISTO-C Bodenablassventile werden typischerweise an der tiefsten Stelle des Behälterbodens eingeschweißt. SISTO bietet verschiedene Einschweißkonstruktionen an.

- Zum Einschweißen in den Behälterboden/-wand
- Kundenspezifische Herstellung
- Varianten:
  - Mit Y-Abgängen
  - Mit Spülanschluss
  - Zum Einbau an die Behälterwand
  - Als Mehrsitzventil
- Ermöglicht restlose Entleerung
- DN 6 bis DN 150

## 2.2.6 SISTO-C Tank Valves

SISTO-C tank bottom valves are typically welded onto the tank bottom at its lowest point. SISTO offers various design options for welding the valve into the tank.

- For welding onto tank bottom/-wall
- Customised valve manufacturing
- Variants:
  - As Y-pattern body design
  - With flush connection
  - For welding onto tank wall
  - As multiport-valve
- Allows complete draining
- DN 6 to DN 150
